

# The beginning of healthy life Fresh Air Healthy Life

Focuses on environmental technology products that have excellent product styles  
Constantly care family health, giving you safe ,healthy, comfortable ,  
convenient and happy life.

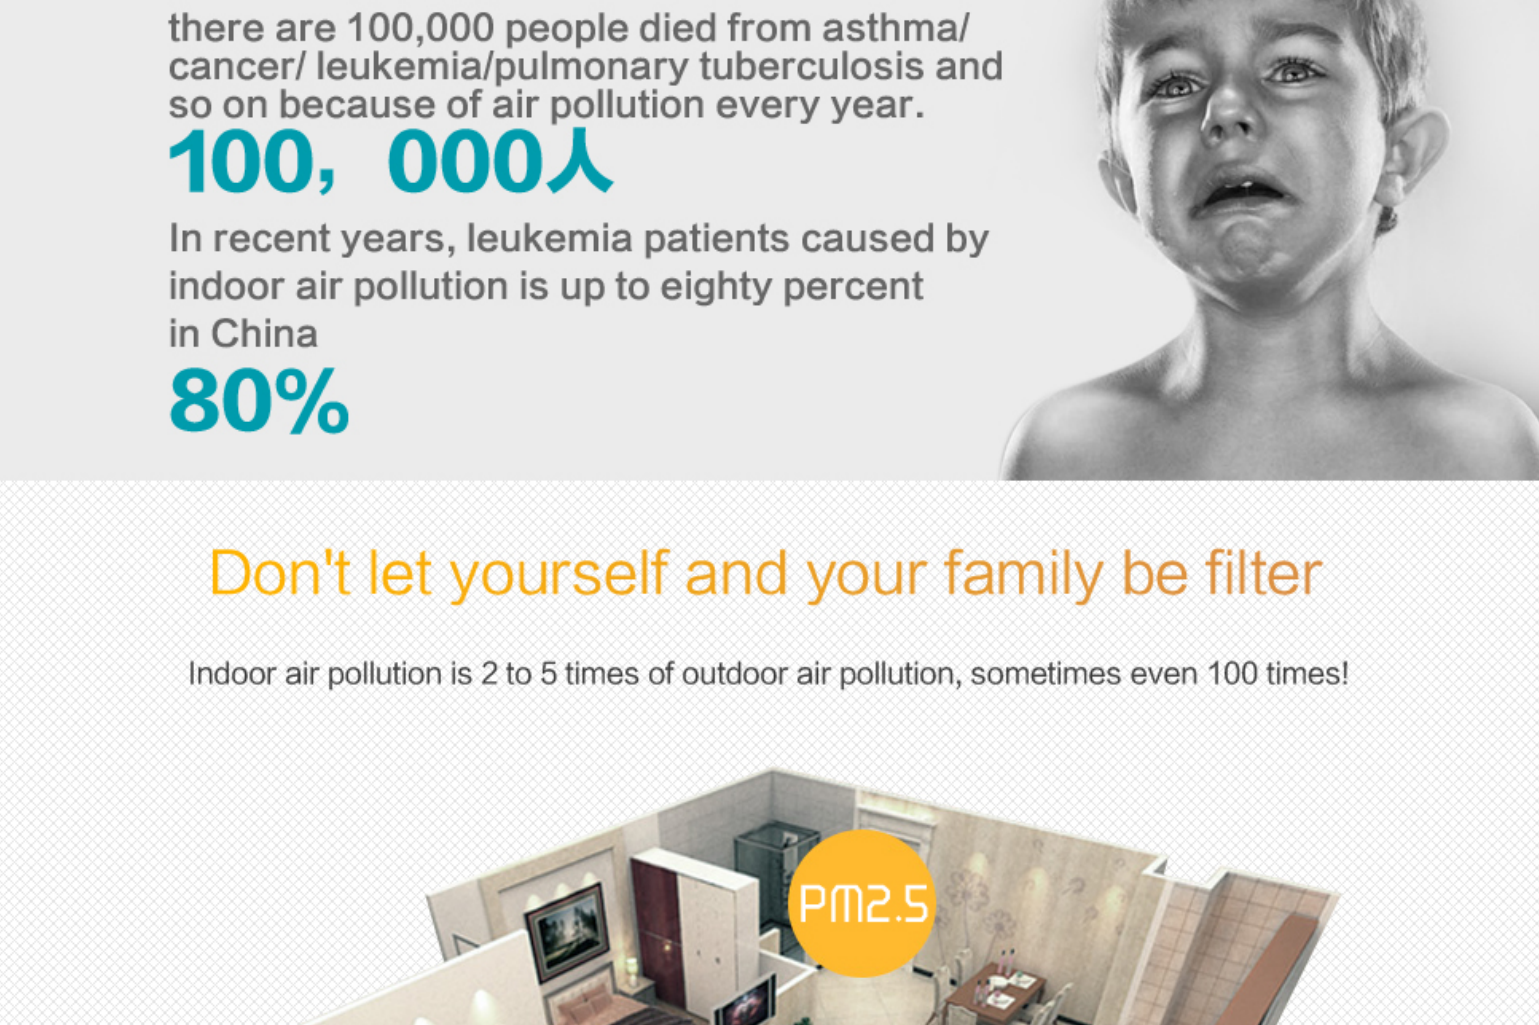

Air purifier-NVKJ488FK08A

Sensitive to capture pollution invisible sweet guardian

- Eliminating particulates in the air
- Eliminating pollutant in the gas
- Eliminating pollutants such as microorganisms

## Why using air purifier?

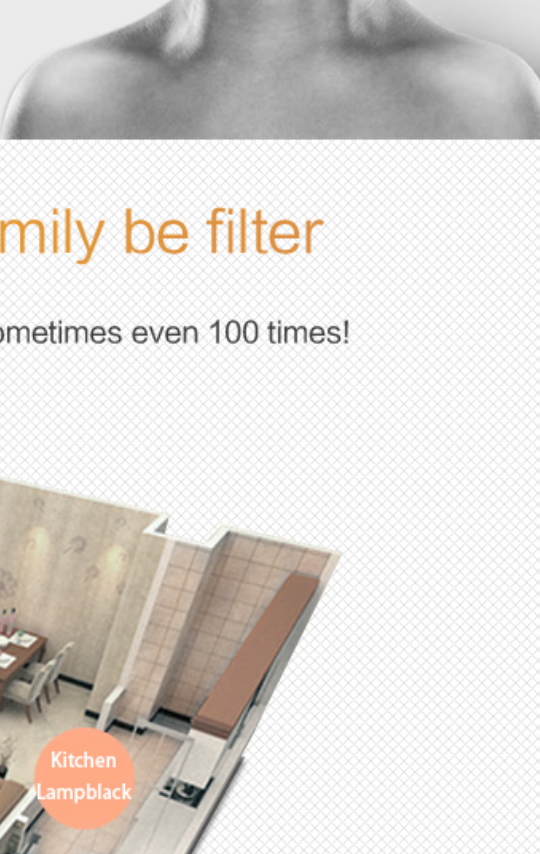

Because indoor pollution is more worse than outdoor pollution

According to statistics:  
there are 100,000 people died from asthma/  
cancer/ leukemia/pulmonary tuberculosis and  
so on because of air pollution every year.

**100,000人**

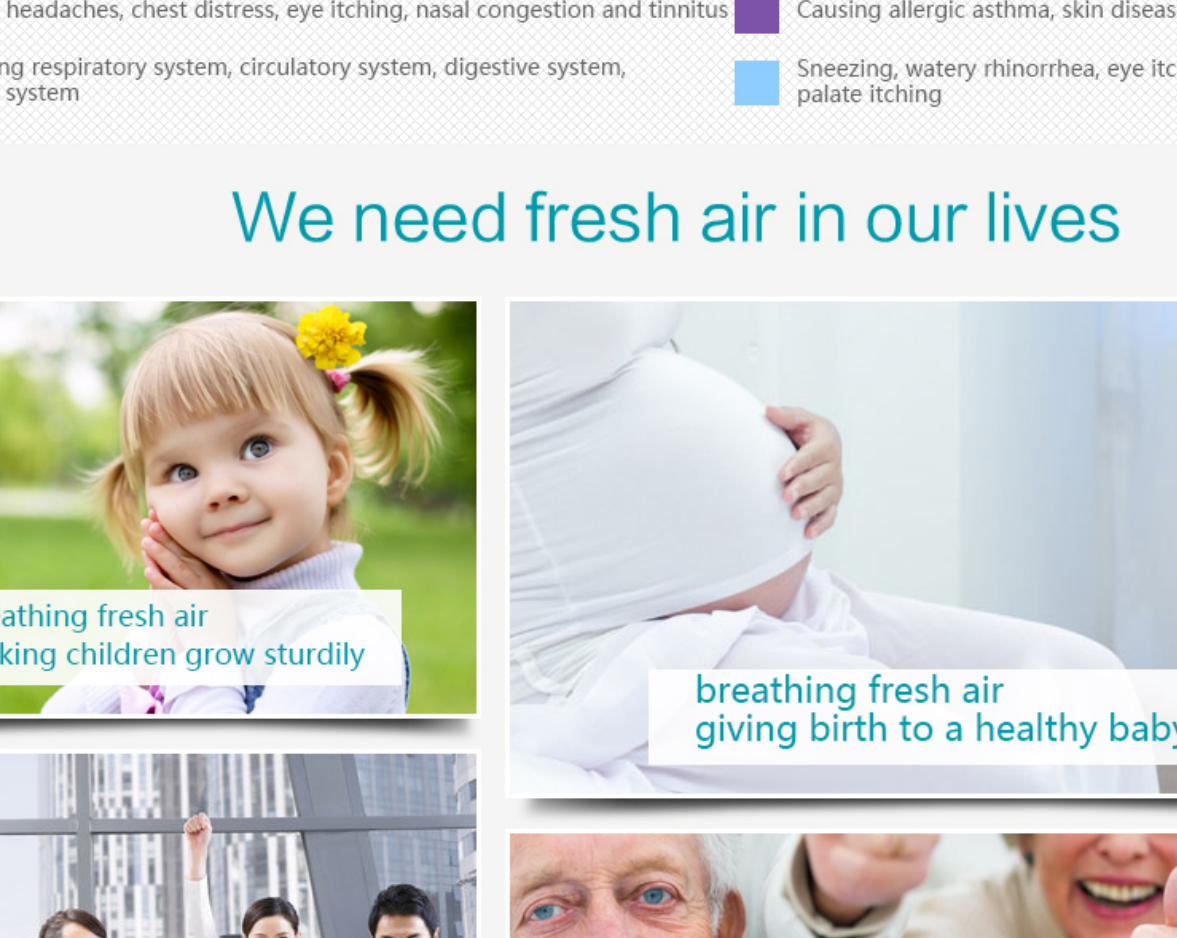

In recent years, leukemia patients caused by  
indoor air pollution is up to eighty percent  
in China

**80%**

Don't let yourself and your family be filter

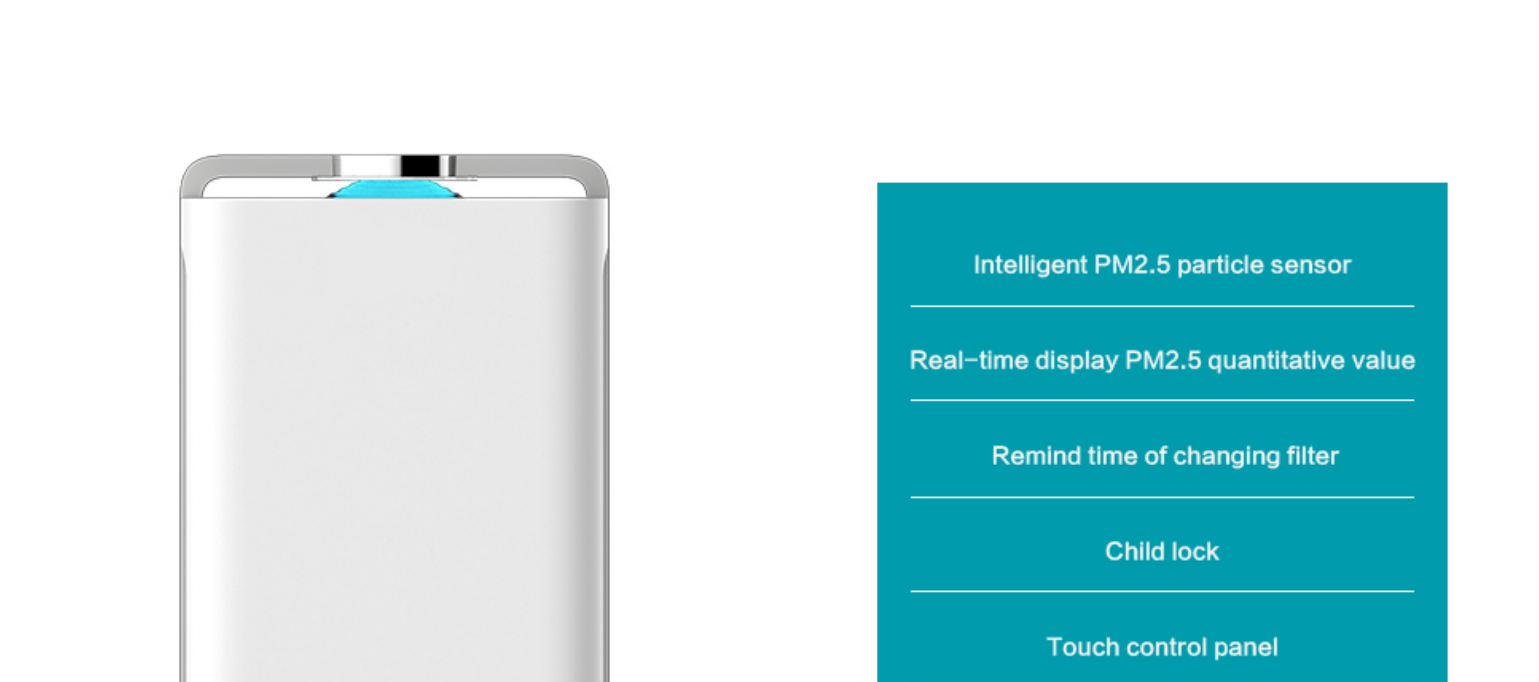

Indoor air pollution is 2 to 5 times of outdoor air pollution, sometimes even 100 times!

### Damage:

- The respiratory tract is not smooth, fetal anomaly, children leukemia
- Damaging hemoglobin's ability of delivering oxygen
- Interfering with the normal biochemical reaction of body, damaging cells
- Causing acute coronary heart disease (CHD), memory deterioration
- Causing headaches, chest distress, eye itching, nasal congestion and tinnitus
- Causing allergic asthma, skin disease
- Damaging respiratory system, circulatory system, digestive system, nervous system
- Sneezing, watery rhinorrhea, eye itching, ear itching, palate itching

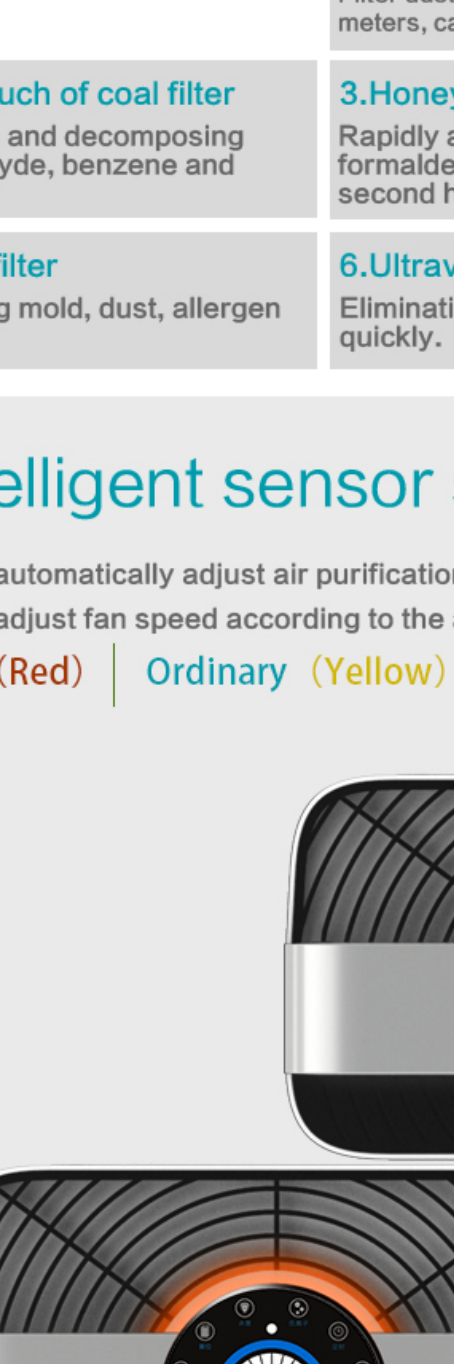

## We need fresh air in our lives

Helps you solve above problems  
Making everyone breath fresh air

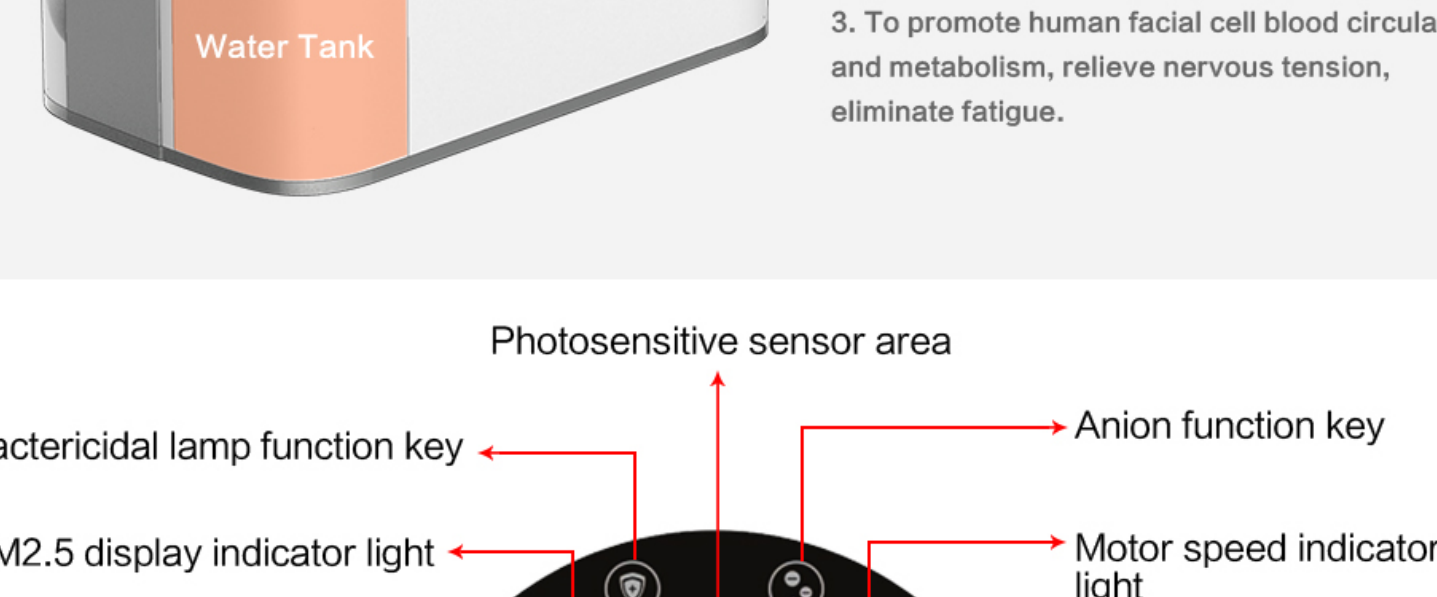

## Product parameter

- Intelligent PM2.5 particle sensor
- Real-time display PM2.5 quantitative value
- Remind time of changing filter
- Child lock
- Touch control panel
- Charge device remote control

Model No.	KJ450FK08A	Voltage	220V 50Hz
Weight	10KG	Power	85W
CADR	450 m3/h	Applicable area	54-80m <sup>2</sup>
Size	400*230*620	Option	Humidifying atomization

## Seventh purification allows for further fine

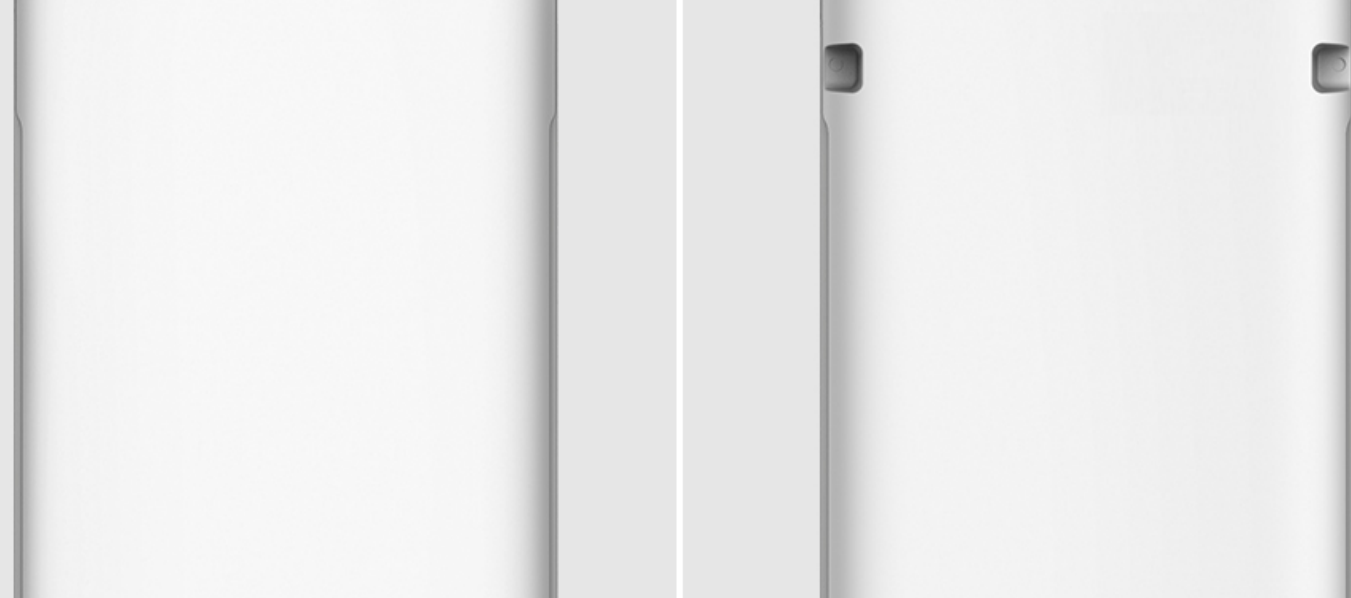

- 1. Aluminum filter**  
Filter dust particles more than 5 micron meters, can clean many times.
- 2. Cold touch of coal filter**  
Absorbing and decomposing formaldehyde, benzene and TVOC.
- 3. Honeycomb activated carbon filter**  
Rapidly adsorbing odor, decomposing formaldehyde, benzene, ammonia and second hand smoking.
- 4. Sterilizing filter**  
Eliminating floating dust particles, acarid, microorganism
- 5. HEPA filter**  
Eliminating mold, dust, allergen and virus
- 6. Ultraviolet sterilization**  
Eliminating virus, bacteria and so on quickly.
- 7. Anion release**  
Improving air quality, multiple health care functions.

## Intelligent sensor system

It can automatically adjust air purification system according to the space's air quality  
It can adjust fan speed according to the air quality, quality display:

Bad (Red) | Ordinary (Yellow) | Good (Green)

## Humidification Function

The machine has a humidification function, in the dry weather can open the humidification function.  
The functions of humidification:

- Increase air humidity and improve people's breathing quality. Effectively remove the air in the musty, smoke and odor, so that the air is more fresh.
- moisturize the skin, more beauty.
- To promote human facial cell blood circulation and metabolism, relieve nervous tension, eliminate fatigue.
