

# FRESH AIR START OF HEALTHY LIFE HEALTHY LIFE

## PROTECT HEALTH AND IMPROVE BREATHING

	<p><b>TAKE GOOD CARE OF CHILDREN</b> Children has low immunity and susceptible to bacterial&amp; virus invasion, needs to purify the environment for them.</p>		<p><b>PROTECTS PREGNANT WOMAN</b> Improve the quality of breathing for expectant mother and reduce air pollution to baby's development, ensure the health and safety.</p>
	<p><b>IMPROVES RESPIRATORY DISEASE</b> Purify the air for patients with asthma, rhinitis and filtering the allergens like dust and pollen</p>		<p><b>KILLS BACTERIA AND VIRUS</b> Floating viruses are easy to cause disease.</p>
	<p><b>ELININATES SECOND HAND SMOKE</b> Effectively on smoke flavor removal, and reducing the harm of secondhand smoke.</p>		<p><b>REUDCES PM2.5</b> Rapidly remove the inhalable lung particles to improve air quality.</p>
	<p><b>REDUCE FORMALDEHYDE, BENZENE</b> Remove the harmful gas like formaldehyde, Benzene efficiently</p>		<p><b>REMOVES TAIL GAS</b> A lot of tail gas produced while car is running.</p>

## ULTRA STRONG PURIFICATION GREAT SATISFACTION

- Advanced purification technology
- Easy plug and play system
- Anion Releasing
- Efficient and low noise
- 360°inlet purifying

## 360° INLET PURIFYING

### Main Function

## CAR AIR PURIFIER

- Releasing of Anions
- Remove PM2.5
- Ultra quiet operation
- HEPA filtering

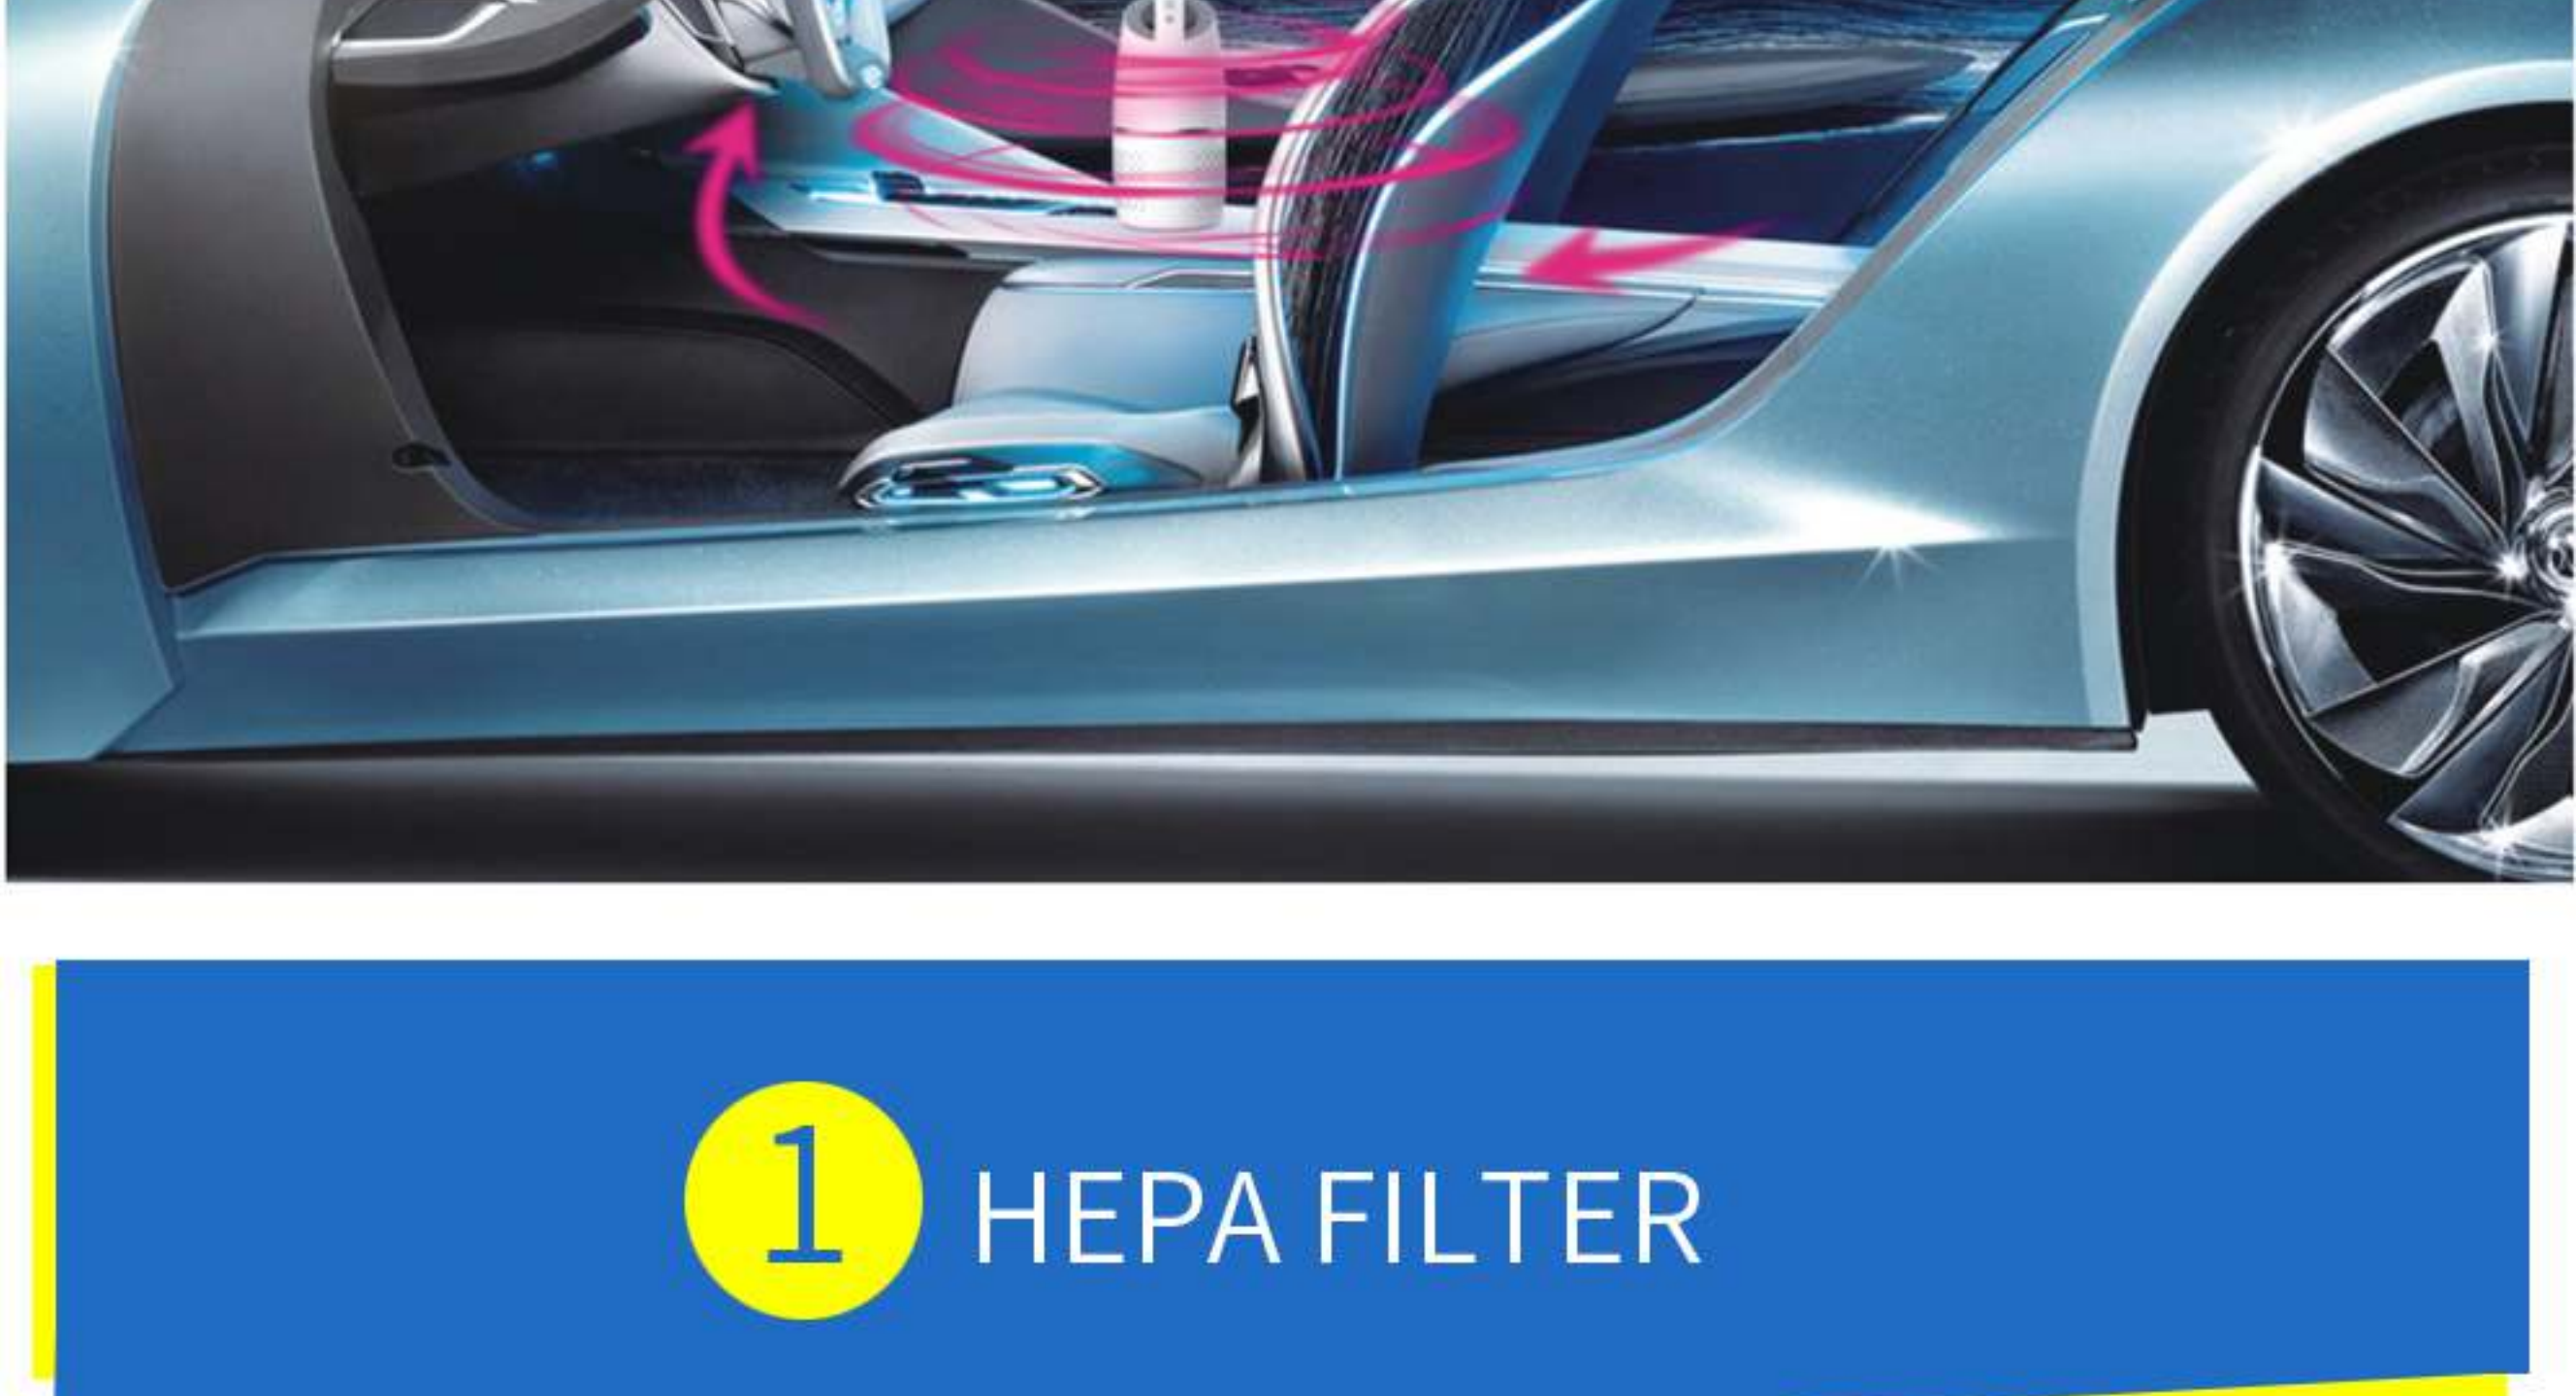

## HEPA FILTER 360° INLET PURIFYING

- Rated Voltage: DC10-15V ,300-500mA
- Filter : HEPA Filter (Imported material)
- Filter Method: Active adsorbed filtration
- Anion concentration:5 million/cm<sup>3</sup>

- CADR :7m<sup>3</sup>/h
- Applicable area:Car Air Purifier
- Net Weight: 250g
- Product Size: 74\*74\*170mm

## 1 HEPA FILTER

### HEPA High precision cycle purification.

Filtering particulate pollutants as small as 0.3 micron such as pollen, bacteria and viruses.

The filtration rate for particulate with 0.1micron to 0.3 micron reach 99%. Effective removal of pollutants like smoke, dust, odors and bacteria.

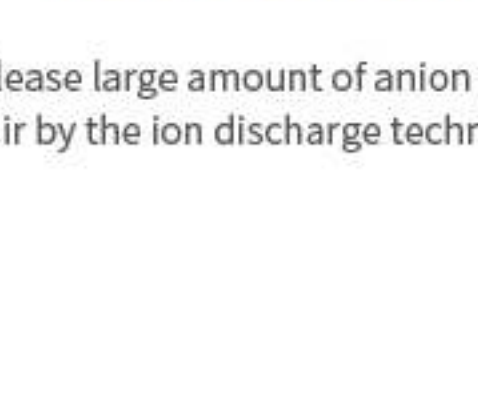

## 2 ANION RELEASE

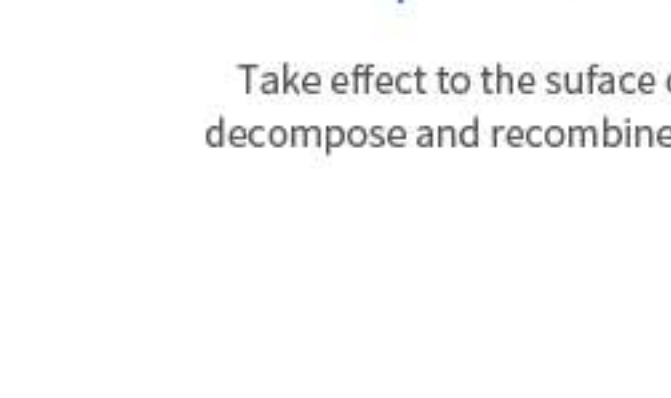

### Releasing of Anions

Anion concentration:5 million/cm<sup>3</sup>

Release large amount of negative anions, anion is the oxygen combined with an outer layer, and have negative charge which has strong adhesion property. The indoor floating dust, smoke, germ and virus are have positive charge and can be gathered together by anions, anions make them loose the ability to float freely in the air and then sink to the ground, in this way air can be purified and and no longer be harm to human body. The ultrafine particles are difficult to be removed by common equipment, while the anion have strong ability to capture these harmful substances. The smaller the particle size, the higher the capture rate.

**Anion Generator**  
Release large amount of anion into the air by the ion discharge technology

**Decompose Bacteria**  
Take effect to the surface of bacteria, decompose and recombine its structure.

**Produce Oxygen rich water molecule**  
Decomposing protein to form oxygen rich water molecules.

## K05 CAR AIR PURIFIER CREATE BETTER FRESH AIR FOR YOU.

Fresh Breath from Best Choice  
Professional Air Purifier, Ideal health life.
